TOOLS / PLATFORM

DockerAWSGitLinuxLaTeX

CURRENTLY WORKING ON

- Microsoft Trellis 2 for image to 3D model generation.
- Segment Anything workflows for segmentation and mask generation.
- Nano Banana Pro model setup and local optimization.
- Advanced ComfyUI workflows for masking, editing, and enhancement.

EDUCATION

B.Tech in Computer Science

RTU, Kota

2016 - 2020

Brijendra Gurjar

SENIOR SOFTWARE DEVELOPER

GENERATIVE AI EXPERT

SENIOR SOFTWARE DEVELOPER | GENERATIVE AI, DEEP LEARNING, AND ML SYSTEMS

Senior Software Developer with **4+ years of experience** building production AI systems for image generation, image editing, and computer vision. Specialized in **Stable Diffusion, ControlNet, ComfyUI, SAM, and Microsoft Trellis 2** for image-to-3D pipelines. Known for strong delivery quality, **9+/10 client feedback**, and production-ready software integration using Python and C++.

EXPERIENCE

Senior Software Developer

Mar 2022 - Present

Ncircle Tech Pvt. Ltd. | Pune, Maharashtra

- Built production-ready generative AI pipelines for image generation and editing using Stable Diffusion and ControlNet.
- Designed and integrated ComfyUI workflows into custom UI for real-world production use.
- Developed a C++ plugin to export 3D geometry from Vectorworks to USD format.
- Worked on segmentation and mask-based editing pipelines using SAM for selective object changes and refinement.
- Contributed to technical documentation and project proposals supporting strong client delivery and acquisition.
- Maintained **9+/10 client feedback** and earned recognition through **Spot Award** and **Extra Miles Award**.

Machine Learning Intern

Aug 2020 - Sep 2020

Celebal Technologies | Jaipur, Rajasthan

- Built a car damage detection model using Detectron2 and achieved 80%+ accuracy on real-world evaluation data.

PROJECTS

AI Image Generation Plugin for Vectorworks

2025

Stable Diffusion and ControlNet integration for architectural and design-oriented rendering workflows inside Vectorworks.

ComfyUI Workflow Automation System

2024

Reusable workflows for image generation, editing, inpainting, and selective enhancement integrated into a custom user-facing pipeline.

AI Image Editing Pipeline

2024

Mask-based object removal, replacement, and targeted enhancement using SAM-driven segmentation and diffusion workflows.

Vectorworks USD Export Plugin

2023

C++ plugin for exporting 3D scene geometry from Vectorworks to Universal Scene Description format.

ACHIEVEMENTS

- 4+ years** building AI-powered production workflows and software systems.
- Maintained consistent **9+/10 client feedback** across delivered projects.
- Received **Spot Award** for strong ownership and high-quality execution.
- Received **Extra Miles Award** for contributions across multiple parallel initiatives.
- Promoted to **Senior Software Developer**.
